Fullstack Software Engineer

Passionate Fullstack Software Engineer with extensive experience building robust enterprise web applications, distributed architectures, high-performance APIs, and modern .NET / TypeScript platforms.

PROFESSIONAL EXPERIENCE

Software Engineer — Sinequa 2021-06 — Present

Engineering and maintenance for the Sinequa Enterprise Search platform (AI-powered internal enterprise search engine).

- New feature development and platform maintenance on the Sinequa Enterprise Search product
- Fullstack Software Engineer (C#, .NET 5, TypeScript) within the 'Platform' core team handling cross-functional systems (external APIs, admin interface, log visualization)

Software Engineer — KDS (American Express Global Business Travel group) 2015-08 — 2021-05

Fullstack development on enterprise SaaS expense management application (Neo Expense).

- Member of an international English-speaking Scrum team (France, Romania) with developers, QA engineer, and Product Owner
- Fullstack developer on the Neo Expense application (3 Scrum teams) using C#, ASP.NET Core, and Backbone.js
- Technical lead and high-level software design point-of-contact in close collaboration with Product Management
- Application maintenance and bug backlog management with Customer Support, Product, and QA teams
- Lead maintainer for third-party frontend and backend dependencies (security upgrades, vulnerability audits, new package approvals)
- Production platform monitoring and observability using the ELK stack (Elasticsearch, Logstash, Kibana)

Software Engineering Intern — KDS 2015-02 — 2015-08

Final-year engineering internship.

- Documentation and enhancement of an ASP.NET WebAPI application with Swagger
- Implementation of application monitoring with the ELK stack

Software Developer Intern — Bouygues Travaux Publics 2014-06 — 2014-07

Engineering development internship.

- Developed an Excel/PDF converter tool used across construction sites (VB.NET)
- Extended an internal document storage web application (ASP.NET, HTML/CSS, JavaScript, SQL Server)

Software Developer Intern — Bouygues Travaux Publics 2013-07 — 2013-08

First technical software internship.

- Developed a server monitoring and supervision application (VB.NET, SQL Server)

EDUCATION

Master of Science in Engineering (Diplôme d'ingénieur) — Télécom SudParis 2012 — 2015

Computer Science & Telecommunications
Major: Distributed Systems & Software Services Architecture

Erasmus Exchange - MSc in Computing — Dublin Institute of Technology (DIT) 2014-09 — 2015-01

Advanced Software Development

Classes Préparatoires aux Grandes Écoles (CPGE) — Lycée Saint-Louis, Paris 2009 — 2012

MPSI & MP (Mathematics, Physics, Computer Science)

French Baccalauréat — Lycée Frédéric Mistral, Fresnes 2009

Science major, Mathematics track
With Highest Honors (Mention Très Bien)

TECHNICAL SKILLS

Backend & Architecture: C# • .NET Core / .NET 5+ • ASP.NET Core • LINQ • REST APIs • Distributed Systems • SQL Server • MySQL • Oracle PL/SQL

Frontend & Web: TypeScript • JavaScript (ES6+) • HTML5 / CSS3 • Less / Sass • Node.js • npm • Backbone.js • jQuery

Methodologies & Quality: Agile / Scrum • TDD & Unit Testing (xUnit, Moq) • Code Reviews • Pair Programming • CI/CD

DevOps, Tools & Observability: Git (GitHub, GitLab, GitKraken) • ELK Stack (Elasticsearch, Logstash, Kibana) • Visual Studio / Rider / VS Code • Jira • PowerShell • TeamCity

LANGUAGES & INTERESTS

Languages:
- French: Native speaker
- English: Full professional proficiency (C2)
- German: Elementary proficiency

Interests:
- Mixology (Cocktail crafting, Flavor design)
- Scuba Diving (CMAS 2-Star / FFESSM Level 2)
- Travel & Live Arts (Concerts, Theater, Cultural exploration)
